

The Assurance Maladie

is the organization that provides a partial reimbursement of health costs (the mandatory portion). Since 2019, all students are affiliated with the Primary Sickness Insurance Fund (CPAM – Caisse primaire d'assurance maladie) general scheme.

Understanding health expenses

In France, health costs* are divided into three categories:

THE FIXED CONTRIBUTION (PAID BY ALL EXCEPT RECIPIENTS OF THE COMPLEMENTARY HEALTH CARE)

The Assurance complémentaire,

is additional health insurance you can

sign up to for better reimbursement.

available: the complementary health

care (Complémentaire santé solidaire)

with limited or without any financial

provides access to quality health care

Solutions for tight budgets are

or "mutual plan"

expenses remaining.

THE COMPLEMENTARY PORTION (REIMBURSED BY YOUR MUTUAL HEALTH INSURANCE IF YOU HAVE ONE

WHAT IS TIERS PAYANT **PAYMENT?**

You do not have to pay the mandatory portion of your visit, which your physician receives directly from the health insurance system. For this to work, your Carte Vitale needs to be up-to-date

Understanding doctors' fees

Not all doctors charge the same fee for any given procedure. Doctors work in two different sectors:

Sector 1 Physicians

Sector 1 physicians apply a flat rate that was pre-determined with the health insurance system, and do not charge any additional fees. This is the basic cost used to calculate the amount that will be reimbursed*:

Sector 2 Physicians

Sector 2 physicians, whether a general practitioner or a specialist, may charge additional fees that are not covered by the CPAM. This will have an impact on the distribution of a visit's costs*:

EXAMPLE: VISIT WITH A 🌫 🕂 ADDITIONAL FEE

THE TREATING PHYSICIAN AND THE CARE - A.A.A.A.A. PATHWAY

Who is the treating physician (le médecin traitant)?

This is a doctor who you choose freely for yourself and report to the health insurance system, with his or her agreement, to receive better reimbursement. This is the medical consultant who coordinates the patient's care pathway. He or she knows the patient's medical history and manages medical records.

What is the care pathway?

This describes the steps you need to follow in your care in order to receive a higher reimbursement when you see a specialist. For this, you must visit a few exceptions to this rule: gynecologists, psychiatrists (if you are between 16 and 25 years old), and ophthalmologists may be seen directly.

Distribution of the reimbursed amounts if the patient has not declared a treating physician, based on €25 fee:

AND THE AMELI ACCOUNT

What is a national health insurance number?

It is a unique, 13-digit identifier assigned to every person affiliated with the French National Health Insurance system (Assurance Maladie).

What is a Carte Vitale?

This free card includes its bearer's health insurance number, and provides access to health care and direct reimbursement.

What is an Ameli account?

This is the on-line account where you can manage your health-related administrative procedures and be notified of reimbursements.

THE "M'T DENTS" (LOVE YOUR TEETH) SCHEME WHAT IS IT?

"M'T Dents" is a meeting of oral prevention offered, during which the dentist:

- Checks the health of your teeth and gums and gives you advice;
- Offers one or more new appointments if your teeth need to be treated.

WHAT IS FREE OF CHARGE:

Oral examination and preservative care (cavities treatment, scaling), as well as surgical acts and x-rays ensuing.

WHAT IS DUE:

All further care scheduled after this initial appointment, such as braces, dentures etc.

→ If your dentist suggest those procedures, they must inform you about fees and reimbursement.

HOW DOES IT WORK FOR YOUNG

• A month before you turn 18, 21 and/or 24, you receive a "M'T Dents" appointment form on you ameli.fr account

• You schedule an appointment with your dentist for an oral examination

• On the day of the appointment, you must present your Carte Vitale and "M'T Dents" appointment form in order not to be charged.
